REACH – Information obligation according to article 33

Ladies and Gentlemen,

Thank you for your inquiry regarding compliance with Regulation (EC) No 1907/2006 (REACH).

The products delivered by us are under the REACH Regulation to "products" which are not subject to registration under REACH.

As a manufacturer of "products" our company is according to the REACH Regulation, a so-called "downstream user" and as such also not subject to REACH registration. A registration requirement of downstream users is only required for direct imports of substances or preparations outside the EU. This is not the case with our company.

Concerning to Article 33 of the REACH Regulation, we inform you that our, delivered products do not contain substances in concentrations above the maximum value of 0.1%, which is given in the ECHA Candidate List (as of 29. January 2018).

We have and will continue to take our suppliers in relation to the new REACH requirements and the obligation to pass information along the value chain as soon as possible.

Best regards
